

Name: _____

Date: _____

Time: ____ : ____ - ____ : ____

You have a zoo full of animals. There are 3 lions, 2 monkeys, 1 parrot and 1 tiger.

1. Which of these animals have equal probability to be picked out of the zoo?

- a. lions and monkeys
- b. lions and parrots
- c. parrots and tigers

Answers:- (a), (b), (c)

Circle the correct answer.

2. Which of these animals is the most unlikely to be picked out of the zoo?

- a. a lion
- b. a monkey
- c. a parrot

Answers:- (a), (b), (c)

Circle the correct answer.

3. What is the probability, in number form, that a monkey will be picked out of the zoo?

- a. $\frac{1}{5}$
- b. $\frac{2}{6}$
- c. $\frac{2}{7}$

Answers:- (a), (b), (c)

Circle the correct answer.

4. If a tiger is taken out of the zoo and 1 lion and 2 more monkeys are added. What is the probability that a lion will be picked out of the zoo?

- a. $\frac{4}{7}$
- b. $\frac{2}{6}$
- c. $\frac{4}{9}$

Answers:- (a), (b), (c)

Circle the correct answer.
