

## Partitioning Rectangles

---

Partition the given rectangle into 2 equal rows and 5 equal columns of same-sized squares, and then fill in the given blank.

1.

Number of small squares made =

Partition the given rectangle into 5 equal rows and 2 equal columns of same-sized squares, and then fill in the given blank.

2.

Number of small squares made =

Partition the given rectangle into 3 equal rows and 5 equal columns of same-sized squares, and then fill in the given blank.

3.

Number of small squares made =

Partition the given rectangle into 2 equal rows and 4 equal columns of same-sized squares, and then fill in the given blank.

4.

Number of small squares made =

Partition the given rectangle into 5 equal rows and 4 equal columns of same-sized squares, and then fill in the given blank.

5.

Number of small squares made =

Partition the given rectangle into 3 equal rows and 2 equal columns of same-sized squares, and then fill in the given blank.

6.

Number of small squares made =

Partition the given rectangle into 5 equal rows and 3 equal columns of same-sized squares, and then fill in the given blank.

7.

Number of small squares made =

Partition the given rectangle into 2 equal rows and 3 equal columns of same-sized squares, and then fill in the given blank.

8.

Number of small squares made =

Partition the given rectangle into 4 equal rows and 4 equal columns of same-sized squares, and then fill in the given blank.

9.

Number of small squares made =

Partition the given rectangle into 4 equal rows and 3 equal columns of same-sized squares, and then fill in the given blank.

10.

Number of small squares made =

**Brad made a chocolate in the shape of a rectangle as shown. He cut them into square pieces by making 3 equal rows and 2 equal columns.**

11. How many square pieces did Brad cut?

- 4
- 6
- 8
- 9

**Bella is making pizza for her family, in the shape as shown. She cut it into square pieces by making 4 equal rows and 4 equal columns.**

12. How many square pieces of pizza did Bella cut?

- 10
- 12
- 14
- 16

Sam had an aluminum sheet in the shape of a rectangle as shown. He cut it into square pieces by making 4 equal rows and 2 equal columns.

13. How many square pieces did Sam cut?

- 6
- 8
- 10
- 12

A carpenter had a board in the shape of a rectangle as shown. He cut it into square pieces by making 5 equal rows and 3 equal columns.

14. How many square pieces did the carpenter cut?

- 10
- 13
- 15
- 18

Annie baked a cake in the shape as shown. She cut it into square pieces by making 5 equal rows and 5 equal columns.

15. How many square pieces did Annie cut?

- 10
- 15
- 20
- 25
