

## Water Cycle Part 3

---

**Choose the correct answer.**

1. The amount of \_\_\_\_\_, whether in the form of snowfall, freezing rain, or wind-drifted snow, is important to glacier survival.

- ☐ condensation  
☐ precipitation

2. Which of the following is formed when water vapor turns into ice?

☐

Snow

☐

Rain

3. Which of the following is the process by which a liquid changes into a gas?

☐

Precipitation

☐

Evaporation

4. Which of the following is the process by which a gas changes into a liquid?

☐ Condensation

☐ Evaporation

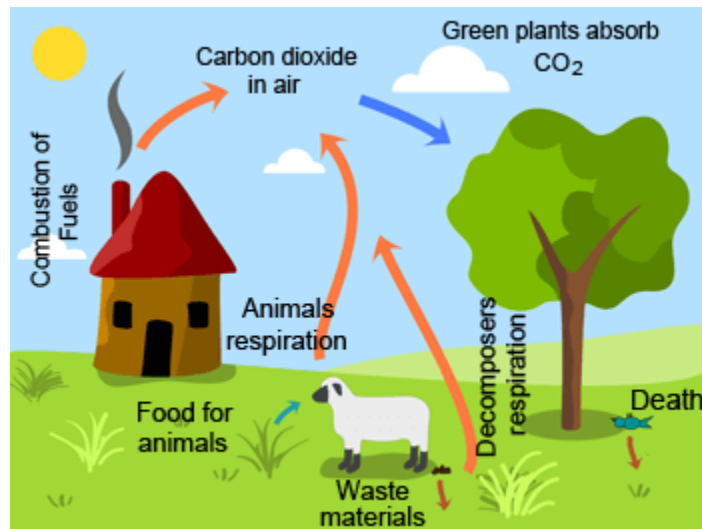

5. Which of the following is the term for rain, snow, sleet, and hail?

- ☐ Evaporation
- ☐ Precipitation

6. Which of the following is the continuous movement of water between the Earth's surface and the air?

☐

Carbon Cycle

☐

Water Cycle

7. Which of the following is the process of water loss from leaves?

- ☐ Transpiration
- ☐ Condensation

8. Rain, snow, hail, and sleet are examples of which of the following?

☐ Condensation

☐ Precipitation

**State whether the following statement is true or false.**

9. The water cycle will occur over a period of approximately three weeks.

☐ True

☐ False

**Choose the correct answer.**

10. The precipitation that falls to the Earth and ends up soaking into the land is called \_\_\_\_\_.

☐

runoff

☐

ground water

11. Which of the following will carry topsoil, nutrients, and other substances as it flows downhill?

☐

runoff

☐

groundwater

12. Which of the following is the source of a natural spring?

☐ ground water

☐ runoff

13. \_\_\_\_\_ is water in the form of droplets that can appear on leaves, cars, or windows, usually in the morning or evening due to condensation.

- ☐ Ground water
- ☐ Dew

14. Which of the following best defines an aquifer?

- ☐ Layers of rock located on the surface of the Earth that are saturated with water that can be accessed through natural springs or by pumping.
- ☐ Aquifers are underground layers of rock that are saturated with water, which can be brought to the surface through natural springs or by pumping.

**State whether the following statement is true or false.**

15. Polar ice caps make up the second largest freshwater source on the planet.

- ☐ True
- ☐ False
